

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 4, between lines 22-29 of the specification with the following:

Figure 5 is an exploded view of a connection system 30 of a further embodiment of an irradiation ~~device 1'~~ device according to the invention. The connection system 30 is provided for connecting the pivot shaft 8 to the support 3 and comprises a fastening element 31 for receiving the shaft 8, which element is attached to the support 3, and a clamp element 32 for clamping the shaft 8 in said fastening element. It is noted that other types of connection systems may alternatively be used to connect the axis to the support. For example, the connection system as shown in FIG. 4 may be applied, this system comprising two housing parts which are connectable to the support and between which the shaft is clamped.
